# SIT725 – Applied Software Engineering Task 7.5P – Project Plan

### Overview of Planned Individual Contribution:

Name	Main Role/s	Target Grade
Dhananjay Choudhari	Frontend Developer, UI/UX Developer	D
Likith Somashekar	Backend Developer, Database Specialist	D
Utkarsh Aggarwal	Full Stack Developer, Scrum Master	D

### Dhananjay Choudhari

Criteria	Pass -> "can do allocated work with guidance"	Credit -> "performs their role in the Project"	Distinction -> "can see themselves in the team and assist others"	High Distinction -> "can demonstrate excellence"
Core Development			Frontend Development for RemixMeals - Implement React.js SPA with responsive design using Materialize CSS - Develop reusable UI components with proper state management - Create user registration, login, and ingredient input interfaces following MVC architecture - Build recipe card displays components with feedback mechanism	
CRUD			Advanced CRUD operations including: - Data validation for user inputs - Input sanitization for ingredient entries - Form validation with proper error handling - Implement bulk update for user profiles	
Design			Frontend design contributions: - Create HI-FI mockups in Figma for all major screens - Develop clickable prototype demonstrating user flows - Design responsive interfaces for both desktop and mobile	

	Contributed			
SRS	significantly to the SRS document: - Drafted Introduction, Product Scope, and Overall Description sections - Defined UI/UX requirements			
Testing	in detail  Manual testing contributions: - Create test cases for frontend components - Document test procedures for UI workflows - Test responsive design across multiple devices - Conduct browser compatibility testing			
Real Time			Real-time implementation: - Integrate Socket.IO on frontend - Implement real- time recipe updates - Create notification system for recipe suggestions	
Discuss with Tutor during workshop			Will discuss with tutor in week 8 to get feedback on UI design and frontend architecture	
Leadership			Support team leadership: - Assist project leader with frontend coordination - Provide UI/UX expertise during planning sessions - Help mentor junior team members on frontend tasks	
Tools	Pass	Credit	Distinction	High Distinction

GIT		Will use feature branches for each UI component - Follow structured git workflow - Create separate branches for major features	
Trello		Will maintain well- documented tasks: - Clear naming conventions - Detailed descriptions - Regular updates on progress - Use checklists and labels	
README file	Will contribute to the README: - Frontend setup instructions - UI component documentation - Environment configuration details		

## Likith Somashekar

Criteria	Pass -> "can do allocated work with guidance"	Credit -> "performs their role in the Project"	Distinction -> "can see themselves in the team and assist others"	High Distinction - > "can demonstrate excellence"
Core Development			Backend Development: - Implement Node.js backend with RESTful API - Develop MongoDB database models and schemas - Create controllers following MVC architecture - Implement authentication and authorization system - Design efficient database queries	
CRUD			Advanced CRUD operations: - Implement data validation & error handling - Develop rolebased access	

T			
		control (RBAC) -	
		Create bulk	
		operations for	
		recipe database -	
		Implement soft	
		delete	
		functionality	
		Backend design: -	
		Create detailed	
		system	
		architecture	
Dooign		diagram -	
Design		Document	
		database schema	
		design - Define	
		API endpoints and	
		data flow	
	Contributed to		
	SRS document: -		
	Developed		
	Specific		
	Requirements		
SRS	(Functional and		
	Non-Functional) -		
	Defined database		
	requirements and		
	constraints		
	Testing		
	contributions: -		
	Create manual		
	test cases for API		
Testing	endpoints -		
resting	Document testing		
	procedures -		
	Develop input		
	validation tests	Dool time	
		Real-time	
		implementation: -	
		Implement	
		Socket.IO for	
DIT:		backend - Create	
Real Time		broadcasting	
		sockets for	
		multiple users -	
		Develop real-time	
		data	
		synchronization	
		Will discuss with	
		tutor in week 9 to	
Discuss with Tutor		get feedback on	
during workshop		database	
		architecture and	
		API design	
		Leadership	
Leadership		excellence: - Act	
		as <b>Project Leader</b>	
-			

			0 Comune Marta	
			& Scrum Master	
			consistently	
			throughout the	
			project - Lead all	
			sprint planning,	
			review, and	
			retrospective	
			sessions - Provide	
			overall technical	
			direction and	
			architectural	
			decisions -	
			Mentor team	
			members on	
			database and	
			backend	
			challenges -	
			Coordinate	
			between frontend	
			and backend	
			teams - Manage	
			project timeline	
			and deliverables -	
			Serve as main	
			point of contact	
			l with stakeholders

## Utkarsh Aggarwal

Criteria	Pass -> "can do allocated work with guidance"	Credit -> "performs their role in the Project"	Distinction -> "can see themselves in the team and assist others"	High Distinction - > "can demonstrate excellence"
Core Development			Full-Stack Development: - Integrate frontend and backend components - Implement Socket.IO for real- time communication - Create authentication middleware - Set up deployment infrastructure - Develop error handling system across application	
CRUD		CRUD operations: - Implement recipe suggestion algorithm - Create feedback mechanism - Develop user profile management		
Design			System architecture: - Create comprehensive system architecture diagram - Document API endpoints and integration points - Design deployment architecture	
SRS			SRS contributions with research: - Documented External Interfaces, Use Cases, and System Architecture -	

			Researched	
			industry	
			standards and	
			best practices -	
			Compared with	
			similar recipe	
			suggestion	
			systems	
			Advanced testing:	
			_	
			- Implement end-	
			to-end testing for	
			critical user	
			workflows - Set up	
Testing			automated testing	
			framework -	
			Prepare test	
			coverage report -	
			Document testing	
			methodology	
Real Time				
			Will discuss with	
			tutor twice (weeks	
			8 and 10) to get	
Discuss with Tutor			feedback on	
during workshop			integration	
			_	
			architecture and	
			testing approach	
			Support team	
			leadership: -	
			Assist project	
			leader with	
			system integration	
			- Provide full-	
			stack expertise	
L a sala sa la la			during planning	
Leadership			sessions - Help	
			mentor team	
			members on	
			integration	
			challenges -	
			Support end-to-	
			end testing	
Tools	Dana	Credit	implementation  Distinction	High Distinction
10018	Pass	Creait	DISTINCTION	High Distinction
				Implement release branches
				- Feature
GIT				branches aligned
				with Trello -
				Manage version
				control - Set up
				CI/CD integration
			Well-documented	
Trollo			tasks: - Detailed	
Trello			descriptions -	
			Regular updates -	
			U	

		Use of all Trello features - Integration with Git commits
README file	README contributions: - Complete project documentation - Detailed setup instructions - Testing procedures - Deployment guidelines	et .
